Israeli bombardment of Gaza City on Saturday killed at least 62 Palestinians, destroyed a residential tower and multiple shelters, and drew UN warnings of an imminent humanitarian catastrophe.

Meanwhile, Israeli forces have escalated raids and mass arrests across the occupied West Bank, detaining more than 1,500 in Tulkarm, injuring residents, and attacking refugee camps under a months-long blockade.

Since October 7, 2023, Israel has killed 64,871 and injured 164,610 others, the majority of whom are women and children, according to the Palestinian Ministry of Health in Gaza.
